

## PERFORMANCE, FIT & FEELING SADDLE PAD

Saddle Pad made of High Quality Memory foam. Originally invented by NASA to absorb all forces with stress on compact acceleration, deceleration and sway stresses. The close contact to the horse gives a feel of stability and security for the top rider and the novice.

Memory Foam Technology!

Order with:  
**Art. No. 99131**

Additional shims for saddle fitting are available—Art. No. 99152

### Recommended use:

- Chronic back pain
- Stiff necks
- Girthy horses
- Kissing spines
- Sciatic syndrome
- Rider asymmetry

## Memory foam—Contour Training

- Contour fit and supportive
- Easy to apply by intelligent Velcro system, incl. two bandages.
- Different sizes available

Art. No. 99101 QH-Size 26 x 34 cm  
Art. No. 99111 TB-Size 30 x 34 cm  
Art. No. 99121 Dressage 34 x 34 cm

## Testimonials

*„With the non freezable gel the gel packs contour the leg to cool evenly and with the compression it really drives the cold in deeper“.*  
Winston Hansman  
NCHA Futurity Champion, Canada

*„The compression factor on the Equomed Lumark therapy boots really drives the cold in, so the effectiveness of cooling the legs after hard work is fantastic“*

Dennis Lynch,  
GP winner Aachen 2009

# Professional Equine Sport Therapy Products

Cryo	Thermo
<b>Cold Therapy</b>	<b>Warm Therapy</b>
Pain reduction	Decrease pain sensations
Swelling reduction	Increase tissue temperature up to 3cm
Rehabilitation facilitation	Improves oxygenation and toxin removal
Decrease muscle tonus (spasm)	Increase tissue extensibility
Hypoxic tissue injury prevention	Decreases joint stiffness and arthritis
Post injury	Pre-event therapy
Post operative treatment	Rehabilitation facilitation
Post event therapy	Hasten healing
Chronic pain	Relax muscles
Even distribution of cold	Swelling reduction

*„Prevention is better then a cure. Cooling the hocks after competition and intensive training is essential for the dressage horse“.*

John Carlos  
Spain

*„The Equomed cold and compression therapy boots are one of the best designs I have seen for rehabilitation and post exercise stress for sport horses“.*

Dr. Marcus Swail SMRCV  
Team Veterinarian, Ireland

*„The combination of gel packs with compression will dramatically reduce pain and swelling and facilitates a faster rehabilitation“*

Michael Baxter  
Equine Sport Therapist and Designer

## Compression Boots & Gel-Packs

**The simplest and most effective way to keep your horse's legs cold!**

### Available models:

- Art. No. 98011 Tendon boots + Gel-packs, pair
- Art. No. 98021 Hock boots + Gel-packs, pair
- Art. No. 98031 Knee/Fetlock boots, pair
- Art. No. 99541 Hoof Compression Boot with gel pack, pair

- Air Compression system for snug fit and effective cooling
- Non freezable Gel-packs
- High capacity cooling
- Gel-packs can be exchanged to be used with the same boot
- Ideal insulation by boot for prolonged cold
- Professional, durable quality
- Anatomically correct fit

## Circulation Systems – the higher Dimension in Cooling

For long during cold effect on horse's leg, we offer a unique circulation system. Using special designed circulation inlays in our compression boots you get a flexible system for all cases from post-event application, acute inflammations to rehab applications

- The system includes:
- Ice tank 7 liters
- 2 splitter hoses for legs front and back
- Pump 19 Volt
- Hose surcingle girth
- 2 Polo hose bandages (10 x 50 cm)
- 2 Tendon Circulation wraps with no drip connectors
- 220 / 110 power adapter with control box

Order with:  
**Art. No. 99990**

## Gel-Packs

- Additional Gel-Packs for Compression boots
- For use without boots, fixed with quick Velco fixers
- High capacity gel packs
- Anatomically correct fit for tendon, hock and hoof

**We did not invent Cold-Therapy. We simply perfected it!**

## Thermo-therapy made easy

### Available models:

- Art. No. 98014 Tendon pack (medium), pair
- Art. No. 98015 Tendon pack (XL), pair
- Art. No. 98024 Hock pack (medium), pair
- Art. No. 98025 Hock pack (XL), pair
- Art. No. 98034 Knee/ankle pack, pair
- Art. No. 99544 Hoof pack, pair

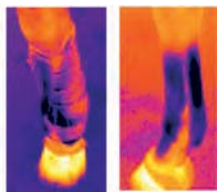

Warming up the back and the muscles of your horse by specially designed gel-packs and elastics bands. Especially suitable for e.g.

- back strain
- Rehabilitation
- Warming up muscles

Can be used for moist and dry heat as needed. Durable and strong quality.

### Available articles:

- Art. No. 98041 3 sizes pack set (2 small, 2 medium, 2 large)
- Art. No. 98051 Back—hot/cold pack set (large), single
- Art. No. 98061 Tendon—hot/cold pack (medium), pair
- Art. No. 98071 Ankle—hot/cold pack (small), pair

Thermogafic Pictures of foot bandaged and after releasing

## Circulation Boots

For anatomical correct fit on the horse different wrap designs are available:

- Art. No. 98013 Tendon Circulation Boots, pair
- Art. No. 98023 Hock Circulation Boots, pair
- Art. No. 98033 Knee Circulation Boots, pair
- Art. No. 98043 Back Circulation Pack, single
- Art. No. 98053 Hoof Circulation Boots, pair
