Evol stirrup is the result of a thorough study with the most sophisticated CAD systems, in order to obtain, with polyamide plastic, a high quality product, joining the productions of the famous system "Jin stirrup".

Sleek, lightweight and grip are its strong point, a product that once again meets the needs of each rider.

Evol Steigbügel sind das Ergebnis einer sorgfältigen Studie mit den modernsten CAD-Systemen, um ein hochwertiges Qualitätsprodukt aus Polyamid-Kunststoff zu erhalten, welches perfekt die Produktpalette des berühmten Systems „Jin Stirrup“ ergänzt. Elegant, leicht und Grip-Fußbett sind seine Stärken. Ein Produkt das wieder einmal die Bedürfnisse jedes einzelnen Reiters erfüllt.

## *jin stirrup*

Jin Stirrup stirrups stand out for the revolutionary design and the use of a material to the vanguard like the aluminium. The aluminium allows us to produce a stirrup with a maximum weight of 300 grams, one of the lowest in the category, without compromising you security in any way.

The Jin Stirrup stirrup offers a "grip" without comparisons, thanks to the special "diamond" manufacturing of the bench support area and to generous surface.

Both the large form and the particular grip of Jin Stirrup give an higher sense of stability which creates an "all one" with your foot.

Jin Stirrup stirrups are obtained by certified sky-high quality aluminium, worked with sophisticated CNC machinery.

Colourings obtained with the anodizing process give the product an effective protection from the corrosion and, for last, offer the possibility of choosing between a colour full range.
